Acoustics First®

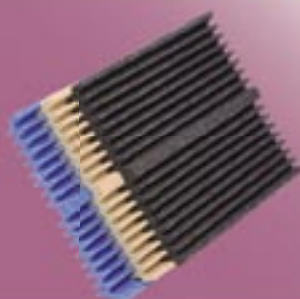

Class 1 Melamine & Traditional Polyurethane Foams

Our line of acoustical foam absorbers can handle the toughest sound requirements ranging from industrial noise to recording and broadcast. Control specular reflections, prevent comb filtering and standing waves by using our Cutting Wedge®, Bermuda Triangle Traps®, Sound Cylinders™ or the basic wedge and pyramid patterns. Most of our foam products are available in polyurethane or FireFlex™ (Class 1) melamine.

FireFlex™

Lightweight open cell acoustical foams. A Class 1 alternative to traditional polyurethane.

Cutting Wedge®

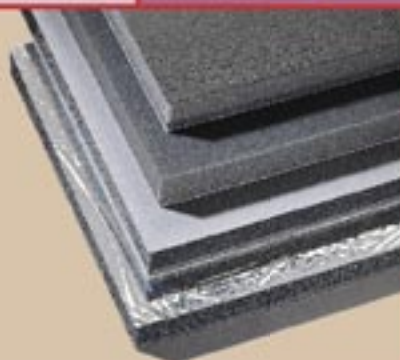

Traditional linear wedges provide increased absorption. New Cutting Wedge 2000® lets you add layers to existing installations. Other foams just don't stack up!

Sound Cylinder™

Composites

Use the composite foam for applications where increased noise absorption, sound transmission loss and/or vibration damping is needed.

Cloudscape® Ceilings

Ceiling Tiles

Raise your ceilings to new levels of visual excitement with advanced acoustical technology. Class 1 Melamine. Drop into existing 24"x24" grids.

6 distinctive patterns.

Isolation Products - To decouple & interrupt structure-borne noise.

Quilted Fiberglass

configured as modular acoustic screens, noise/workstation enclosures, panel fold track and roller systems, wall panels, noise curtains. Also, available in rolls that are single faced, double faced and double faced with barrier septum. Standard sizes or made-to-order.

STC=29 NRC=0.70

Cloudscape® Baffles

Designed to solve acoustical problems economically in large to small spaces to improve speech intelligibility.

9 vibrant color selections.

Toll Free 1-888-765-2900

Absorbers & Diffusers

Sonora™

Standard wall panels are available in 48 Guilford of Maine® colors, one-inch and two-inch depth in sizes up to 4' X 10', with square, radius or beveled edges and many mounting options.

NRC= 0.80 to 1.10

Panels may be made as ceiling clouds, hanging baffles or grid-mounted ceiling tiles with an optional sound blocking layer.

Double Duty™ Diffuser

Pyramidal Diffuser

QuadraPyramid™

Diffusion preserves sound while reducing intensity by distributing energy over a larger area. The traditional pyramidal units create many different reflective angles. The polycylindrical "barrel" diffusers serve "Double Duty", by adding bass absorption to complement the Sonora wall panels. The unique surface of the Art Diffuser spreads sound in a uniform predictable pattern.

Geometrix™

Quiet Louver™

Add depth to improve bass response or combine absorption with the warm beauty of wood to create a seamless wall.

Acoustics First®

Control On A Roll

BlockAid™ Vinyl Sound Barrier

to block noise.

Increases wall mass without increasing depth.
0.125" Thick, STC = 27

Sound Channels® Acoustical Wall Covering

to soften sound.

Looks as good as it sounds.
Increases intelligibility and reduces fatigue.
Fabric alone measures NRC = 0.20

Guilford of Maine® Fabric FR701® Style 2100

	Wheat		Eucalyptus
	Wedgewood		Ultramarine
	Baltic		Sienna
	Crystal Blue		Pearl
	Grey Mix		Bayberry
	Medium Grey		Silver Papier
	Quartz		Blue Papier
